PROFESSIONAL SUMMARY

A results-driven **Computer Science undergraduate** at IIT (affiliated with the University of Westminster, UK), specialising in **full-stack development with a strong focus on backend engineering**. Proficient in building scalable RESTful APIs, cloud-deployed web applications, and AI-powered platforms using Node.js, Python, Django, FastAPI, and PostgreSQL. I bring over **three years** of professional Software QA experience achieving **diamond-tier status** across global testing platforms and entrepreneurial leadership as **Co-Founder & Tech Lead** of a tech startup. Seeking a **full-stack internship with a backend focus** to apply my expertise, contribute to production-grade engineering, and grow within a high-impact team

EDUCATION

BSc (Hons) in Computer Science – University of Westminster (UK), affiliated with Informatics Institute of Technology (IIT), Sri Lanka | **2024 – 2028 (Expected)**

- **Key Modules:** Programming · Data Structures and Algorithms · Machine Learning · Object-Oriented Programming · Web Development · Databases

Foundation in ICT – Informatics Institute of Technology (IIT), Sri Lanka | **2024** | **Distinction**

Diploma in General IT – ESOFT | **2022 – 2023** | **Distinction**

Local O/L – IKRA International College | **2010 – 2021** | **7 A's, including an A in English, Mathematics, and Science**

EXPERIENCE

Freelance Software Quality Assurance Tester – Test IO · uTest · TesterWork · Testbirds | **Aug 2022 - Present**

- **Diamond-tier tester:** Reported **500+** verified bugs across major web, mobile, including platforms like **(Facebook, Instagram, Canva)**, ranking in the **top 3 among 60+ testers in ~90% of active projects**, with multiple **#1 placements** for highest-quality bug reports.
- **High-impact recognition:** Selected for a specialized research team targeting critical bugs on Facebook and Instagram; received multiple client awards for identifying defects.
- **Technical depth:** Used Charles Proxy and Android SDK tools to capture logs, Executing structured test cases and exploratory testing on high-traffic consumer platforms and digital products used by millions worldwide and translating findings into detailed bug reports with clear reproduction steps, logs, and supporting evidence.

Co-Founder & Tech Lead – QuickBrix – Digital Marketplace for Construction Supplies | **Jan 2026 – Present**

- **Architecture & delivery:** Leading full-stack development of a multi-portal marketplace (Flutter, Django, PostgreSQL)
- **Team:** Managing a cross-functional team of 6 (frontend, backend, QA, design) toward MVP delivery.
- **Startup execution**: Integrating Google Maps, Firebase, and payment gateways; prepared investor pitch deck and financials while engaging potential investors for pre-seed funding.

PROJECTS

LinkForge – Full-Stack URL Management Platform | Individual · Personal | **2026**

Technologies: *Node.js, Express, PostgreSQL, Redis, JWT, bcrypt, nanoid, Docker, Docker Compose*

- **Cache-aside redirects:** Implemented Redis-first lookup with PostgreSQL fallback, significantly reducing database pressure on high-frequency short links and improving redirect latency.
- **Production-grade backend:** JWT-authenticated URL creation, optional expiration dates, click-count tracking, and auto-initialized DB schema on container startup.
- **Containerized stack:** Full Docker Compose orchestration (API + PostgreSQL + Redis) with a React (Vite + Tailwind) frontend.

Clovio – AI-Powered Academic Collaboration Platform | Group · IIT | **2026**

Technologies: *FastAPI (Python), React (TypeScript), PostgreSQL, Groq/DeepSeek LLMs, JWT, Railway, Vercel, GitHub Actions*

- **AI milestone engine:** Auto-decomposes project descriptions into structured milestones with effort points and suggested timelines using Groq Llama 3.3 / DeepSeek via OpenRouter.
- **Smart task assignment:** Distributes tasks to best-matched team members based on skills and workload; detects skill gaps and quantifies workload fairness using a Gini Coefficient score.

- **Full CI/CD pipeline:** Deployed backend on Railway, frontend on Vercel, with GitHub Actions automating test and deploy workflows.

ShopSphere – Full-Stack AWS E-Commerce Platform | Individual · Personal | **2025 – 2026**
Technologies: *React 19, Node.js, Express, SQLite, AWS Elastic Beanstalk*

- **Complete buyer journey:** Product catalog, live search, cart management, checkout, order placement, and delivery tracking — all API-driven with Sequelize ORM abstraction.
- **AWS deployment:** Hosted on Elastic Beanstalk behind an Application Load Balancer with auto-scaling.
- **View Live Application**

Task Manager REST API | Individual · Personal | **2024 – 2025**
Technologies: *Python, Django, Django REST Framework, JWT (djangorestframework-simplejwt), SQLite, Thunder Client*

- **Secure multi-user API:** JWT authentication with full user isolation where each user can only access and manage their own tasks.
- **Advanced query support:** Filtering by status, priority, and completion; full-text search; ordering by due date/priority; and pagination all built to production REST standards.

Automated Price Intelligence System | Individual · Personal | **2025**
Technologies: *Python, Selenium, JSON, smtplib, Windows Task Scheduler*

- **Dynamic scraping:** Selenium-based automation handles JavaScript-rendered pages where requests/BeautifulSoup fail; uses explicit waits to mimic real user behavior and avoid bot detection.
- **Alerting & history:** Maintains a JSON price history, compares against previous entries, and dispatches Gmail alerts on price drops; fully automatable via Windows Task Scheduler.

LEADERSHIP & ACHIEVEMENTS

Leadership

- **QuickBrix Co-Founder & Tech Lead:** Co-Founded and lead a 6-person cross-functional startup, owning all technical architecture, sprint planning, and investor engagement from zero to MVP.
- **Technical Lead, Clovio (Group Project):** Finalised technology stack, mentored teammates on feature implementation, and served as the primary technical decision-maker throughout the project.

Achievements

- **Creative CoCreate Mentorship (2026):** QuickBrix shortlisted from a competitive pool; awarded 1-on-1 mentorship with Director & Co-Founder of Creative Software.
- **Elite QA Recognition:** Diamond-ranked; selected for specialized research teams on Facebook & Instagram; earned multiple client awards for preventing production-level failures.
- **Consistent Top Performer:** Ranked #1 for bug report quality across multiple cycles; top-3 placement in ~90% of active test projects globally.

SKILLS

Languages: Python · JavaScript · Java · SQL
Backend: Node.js · Express · Django · FastAPI · Django REST Framework
Frontend: React · HTML · CSS
Databases: PostgreSQL · Redis · SQLite
DevOps & Cloud: Docker · Docker Compose · Git · GitHub Actions · AWS (Elastic Beanstalk)
Testing & QA: Charles Proxy · Android SDK Tools · Structured & Exploratory Testing
Design & Tools: Figma (wireframes, prototypes) · Canva · JWT
