PROFILE

Computer Science student interested in scalable systems, modern software development, and building applications that balance performance, usability, and reliability.

EDUCATION

BSc (Hons) Computer Science – University of Westminster (UK) / IIT, Sri Lanka | **2024 – 2028 (Expected)**

- **Key Modules:** Programming · DSA · Machine Learning · OOP · Web Development · Databases

Foundation in ICT – Informatics Institute of Technology (IIT), Sri Lanka | **2024** | **Distinction**

Diploma in General IT – ESOFIT | **2022 – 2023** | **Distinction**

Local O/L – IKRA International College | **2010 – 2021** | **7 A's**

EXPERIENCE

Co-Founder & Tech Lead – QuickBrix – Digital Marketplace for Construction Supplies | **Jan 2026 – Present**

- **Architecture & delivery:** Leading full-stack development of a multi-portal marketplace (Flutter, Spring Boot, PostgreSQL); Managing a cross-functional team of 4 (frontend, backend, QA, design) toward MVP delivery.
- **Startup execution:** Integrating Google Maps, Firebase, and payment gateways; prepared investor pitch deck and financials while engaging potential investors for pre-seed funding.

Freelance Software Quality Assurance Tester – Test IO · uTest · TesterWork · Testbirds | **Aug 2022 - Present**

- **Diamond-tier tester:** Reported **500+** verified bugs across major web, mobile, including platforms like **(Facebook, Instagram, Canva)**, ranking in the **top 3 among 60+ testers in ~90% of active projects**, with multiple **#1 placements**.
- **High-impact recognition:** Selected for a specialized research team targeting critical bugs on Facebook and Instagram; received multiple client awards for identifying defects.
- **Technical depth:** Used Charles Proxy and Android SDK tools, executed structured and exploratory test cases with detailed bug reports including logs and reproduction steps.

PROJECTS

Clovio – AI-Powered Academic Collaboration Platform | Group · IIT | **Live** | **2026**

Technologies: FastAPI (Python), React (TS), PostgreSQL, Groq/DeepSeek LLMs, JWT, Railway, Vercel, GitHub Actions

- **AI milestone engine:** Auto-decomposes project descriptions into structured milestones with effort points and suggested timelines using Groq Llama 3.3 / DeepSeek via OpenRouter.
- **Smart task assignment:** Distributes tasks to best-matched team members based on skills and workload; detects skill gaps and quantifies workload fairness using a Gini Coefficient score.
- **Full CI/CD pipeline:** Backend on Railway, frontend on Vercel, GitHub Actions automating test and deploy workflows.

LinkForge – Full-Stack URL Management Platform | Individual · Personal | **2026**

Technologies: Node.js, Express, PostgreSQL, Redis, JWT, bcrypt, nanoid, Docker, Docker Compose

- **Cache-aside redirects:** Redis-first lookup with PostgreSQL fallback, reducing DB load and improving redirect latency.
- **Production-grade backend:** JWT-authenticated URL creation, optional expiration dates, click-count tracking, and auto-initialized DB schema on container startup.
- **Containerized stack:** Full Docker Compose (API + PostgreSQL + Redis) with a React (Vite + Tailwind) frontend.

ShopSphere – Full-Stack AWS E-Commerce Platform | Individual · Personal | **Live** | **2025 – 2026**

Technologies: React 19, Node.js, Express, SQLite, AWS Elastic Beanstalk

- **Complete buyer journey:** catalog, search, cart, checkout, order placement, and delivery tracking via Sequelize ORM.
- **AWS deployment:** Hosted on Elastic Beanstalk behind an Application Load Balancer with auto-scaling.

RecruitFlow – Full-Stack Recruitment Pipeline System | Individual · Personal | **2026**

Technologies: Node.js, Express.js, PostgreSQL, React (Vite), Axios, CSS

- **Kanban pipeline UI:** React frontend visualises candidates moving through recruitment stages (Applying → Screening → Interview → Test); stage transitions are persisted in real time via REST API calls.

- **Production-ready backend:** Express + PostgreSQL API with full CRUD, filtering by stage/score/referral, sorting, and pagination — built to handle scalable candidate volumes cleanly.
- **End-to-end integration:** Frontend and backend fully decoupled; loading states, empty states, and error handling implemented throughout the UI for a polished user experience.

Smart Campus – Sensor & Infrastructure Management | Individual · Academic | 2025

Technologies: *Java, JAX-RS (Jersey 2.34), Apache Tomcat 9, Maven, REST, ConcurrentHashMap*

- **RESTful API design:** Built a multi-level campus management API for rooms, sensors, and historical sensor readings following REST principles with resource-based URLs, JSON contracts, and proper HTTP status handling.
- **Reliability & state management:** Implemented thread-safe in-memory state handling using ConcurrentHashMap with custom JAX-RS exception mappers and automated request logging for consistent error responses and API traceability

Task Manager REST API | Individual · Personal | 2024 – 2025

Technologies: *Python, Django, Django REST Framework, JWT (djangorestframework-simplejwt), SQLite, Thunder Client*

- **Secure multi-user API:** JWT authentication with full user isolation where each user can only access and manage their own tasks.
- **Advanced query support:** Filtering by status, priority, and completion; full-text search; ordering by due date/priority; and pagination all built to production REST standards.

Automated Price Intelligence System | Individual · Personal | 2025

Technologies: *Python, Selenium, JSON, smtplib, Windows Task Scheduler*

- **Dynamic scraping:** Selenium-based automation handles JavaScript-rendered pages where requests/BeautifulSoup fail; uses explicit waits to mimic real user behavior and avoid bot detection.
- **Alerting & history:** Maintains a JSON price history, compares against previous entries, and dispatches Gmail alerts on price drops; fully automatable via Windows Task Scheduler.

ACHIEVEMENTS

- **Creative CoCreate Mentorship (2026):** QuickBrix shortlisted from a competitive pool; awarded 1-on-1 mentorship
- **Elite QA Recognition:** Diamond-ranked; selected for specialized testing projects on Facebook & Instagram; earned multiple client awards for preventing production-level failures.
- **Consistent Top Performer:** Ranked #1 for bug report quality across multiple cycles; top-3 placement in ~90% of active test projects globally.

EXTRACURRICULAR ACTIVITIES

- Inter-School Zonal Football Tournament — **Champions (2019)**
- Inter-School Futsal Tournament — **1st Runner-Up (2021)**
- Inter-School District Athletics Championship — 100m Sprint, **2nd Runner-Up (2017)**

SKILLS

Languages: Python · JavaScript · Java · SQL

Backend: Node.js · Express · Django · FastAPI · Django REST Framework

Frontend: React · HTML · CSS

Databases: PostgreSQL · Redis · SQLite

DevOps & Cloud: Docker · Docker Compose · Git · GitHub Actions · AWS (Elastic Beanstalk)

Testing & QA: Charles Proxy · Android SDK Tools · Structured & Exploratory Testing

Design & Tools: Figma (wireframes, prototypes) · Canva · JWT
