

RIMAZ SATHTHAR

+94 760 718 737 | rimaz.asm@gmail.com | [portfolio](#) | linkedin.com/in/rimaz-saththar | github.com/Rimaz17

PROFILE

Computer Science student interested in scalable systems, modern software development, and building applications that balance performance, usability, and reliability.

SKILLS

Languages: Java, Python, JavaScript, SQL

Backend: Spring Boot, Node.js, Express, Django, FastAPI, Django REST Framework

Frontend: React, HTML, CSS

Databases: PostgreSQL, Redis, SQLite

DevOps & Cloud: Docker, Docker Compose, Git, GitHub Actions, AWS (Elastic Beanstalk), Railway, Firebase

Testing & QA: Postman, API Testing, Manual Testing, Charles Proxy, Bug Reporting

Design & Tools: Figma (wireframes, prototypes)

EXPERIENCE

Co-Founder & Tech Lead at QuickBrix – Digital Marketplace for Construction Supplies Jan 2026 - Present

- Architecting a **3-portal marketplace** (Customer, Merchant, Driver + Admin console) using Flutter, Spring Boot, and PostgreSQL, including a real-time **store-matching engine (5km radius)** and weight-based delivery/pickup routing (**250kg threshold**); leading a **team of 4** through Agile/Scrum sprints toward MVP.
- Building Firebase Auth/FCM and Google Maps API integration for live tracking, delivery-time estimation, and PIN-based order verification; migrated hosting from AWS to Railway after re-scoping MVP infra needs; prepared the investor pitch deck and financials for pre-seed fundraising.

Freelance Software Quality Assurance Tester – Test IO · uTest · TesterWork · Testbirds Aug 2022 - Apr 2026

- Reported **500+** verified bugs across major web, mobile, including platforms like (**Facebook, Instagram, Canva**) as a Diamond-tier tester, ranking in the **top 3 among 60+ testers in ~90% of active projects**, with multiple **#1 placements**.
- Selected for a specialized Facebook/Instagram research team; used Charles Proxy and Android SDK tools to execute structured and exploratory tests with detailed logs and reproduction steps, earning multiple client awards.

PROJECTS

Clovio – AI-Powered Academic Collaboration Platform | Group · IIT | [Live](#) | [GitHub](#) Dec 2025 - Mar 2026

Technologies: FastAPI, React (TS), PostgreSQL, Groq/DeepSeek LLMs, JWT, Railway, Vercel, GitHub Actions

- Built an **AI milestone engine** that Auto-decomposes project descriptions into structured milestones and timelines using a dual-provider **LLM setup** (DeepSeek primary, Groq/Llama 3.3 fallback) for automatic failover reliability.
- Designed smart task assignment that matches tasks to team members by skill and workload, detects skill gaps, and quantifies workload fairness using a **Gini Coefficient score**.
- Set up a full **CI/CD pipeline** with backend on Railway and frontend on Vercel, using GitHub Actions to automate test and deploy workflows.

LinkForge – URL Management Platform | Individual · Personal | [GitHub](#) Nov 2025 - Feb 2026

Technologies: Node.js, Express, PostgreSQL, Redis, JWT, bcrypt, nanoid, Docker, Docker Compose

- Implemented **Redis-first**, cache-aside URL redirects with PostgreSQL fallback, reducing DB load and improving redirect latency.
- Built a production-grade backend with JWT-authenticated URL creation, optional expiration dates, click-count tracking, and auto-initialized DB schema on container startup.
- Containerized the full stack with **Docker Compose** (API + PostgreSQL + Redis) and a React (Vite + Tailwind) frontend.

ShopSphere – AWS E-Commerce Platform | Individual · Personal | [GitHub](#) Feb 2026 - Mar 2026

Technologies: React 19, Node.js, Express, SQLite, AWS Elastic Beanstalk

- Built the complete buyer journey; catalog, search, cart, checkout, order, and delivery tracking via Sequelize ORM
- Deployed on **AWS Elastic Beanstalk** behind an Application Load Balancer with **auto-scaling**.

Technologies: Node.js, Express.js, PostgreSQL, React (Vite), Axios, CSS

- Built a Kanban-style React frontend visualizing candidates moving through recruitment stages (Applying → Screening → Interview → Test), with stage transitions persisted in **real time** via REST API calls.
- Created a **production-ready** Express + PostgreSQL API (CRUD, filtering, sorting, pagination) and integrated it with a decoupled frontend featuring robust loading, empty, and error handling states.

Smart Campus – Sensor & Infrastructure Management | Individual · Academic | [GitHub](#)

Apr 2026

Technologies: Java, JAX-RS (Jersey 2.34), Apache Tomcat 9, Maven, REST, ConcurrentHashMap

- Built a multi-level **RESTful** campus management API for rooms, sensors, and historical sensor readings following REST principles with resource-based URLs, JSON contracts, and proper HTTP status handling.
- Implemented **thread-safe** in-memory state handling using ConcurrentHashMap with custom JAX-RS exception mappers and automated request logging for consistent error responses and API traceability

Task Manager | Individual · Personal | [GitHub](#)

Aug 2024 - Sep 2024

Technologies: Python, Django, Django REST Framework, JWT (djangorestframework-simplejwt), SQLite, Thunder Client

- Built a secure multi-user API with **JWT authentication** and full user isolation, so each user can only access and manage their own tasks.
- Added advanced query support, including filtering by status, priority, and completion, full-text search, ordering by due date or priority, and pagination, all built to production REST standards.

Automated Price Intelligence System | Individual · Personal | [GitHub](#)

Oct 2025

Technologies: Python, Selenium, JSON, smtplib, Windows Task Scheduler

- Used Selenium-based automation to handle JavaScript-rendered pages where requests/BeautifulSoup fail, with explicit waits to mimic real user behavior and **avoid bot detection**.
- Maintained a JSON price history, compared entries over time, and dispatched Gmail alerts on price drops, fully automated via Windows Task Scheduler.

EDUCATION

BSc (Hons) Computer Science – University of Westminster (UK) / IIT, Sri Lanka

Sep 2024 - May 2028

- **Key Modules:** Programming · DSA · Machine Learning · OOP · Web Development · Databases

Foundation in ICT – Informatics Institute of Technology (IIT), Sri Lanka | **Distinction**

Jan 2024 - Aug 2024

Diploma in General IT – ESOFIT | **Distinction**

Aug 2022 - Jul 2023

Local O/L – IKRA International College | **7 A's**

Jan 2010 – Dec 2021

ACHIEVEMENTS

CodeSprint 11 Finalist. Selected among top projects (**Clovio**) in a competitive hackathon for innovation.

Diamond-ranked QA tester with repeated **#1 rankings and top-3 placement in ~90% of global projects**; selected for specialized testing on **Facebook & Instagram**; received multiple client awards for critical defect identification.

Selected for Creative CoCreate Mentorship (2026). **QuickBrix** shortlisted from a competitive pool, **awarded 1-on-1 mentorship**.
